- Brain Injury Alliance of Iowa
- Henry Schein

Required Materials and Equipment

- In-person attendance - there are no required materials or equipment

Learning Objectives

Sidelined: Helping Athletes Adapt and Thrive After Medically-Forced Exit From Sport

- Identify common psychological struggles of permanently-sidelined athletes coping with the transition out of competition.
- Explain the Stages of Grief & Transition as they relate to the permanently-sidelined athlete.
- Summarize Brown & Hogg's Model of Healthy Adjustment Following Career-Ending Athletic Injury.
- Differentiate how they can support the permanently-sidelined athlete in the six key areas of: grief and loss, identity crisis, mental health concerns, maintaining motivation, support network, and resources.

Mental Health and Resiliency for Health Care Providers

- Analyze the stressors that affect health care providers.
- Recognize skills that may improve mental resiliency.
- Develop skills to improve physical and mental resiliency.
- Develop understanding of how physical and mental resiliency are related.

Clinical Athletic Trainers as integral part of Orthopedic Hand Team

- Emphasize value of AT in hand clinic.
- Review skills ATs bring to hand clinic.
- Interprofessional team and where we fit in/our role.

Dermatologic Conditions in Skin of Color

- Participants will be able to identify common dermatologic conditions in patients with skin of color.
- Participants will become familiar with the best treatment modalities available for common skin disorders.
- Participants will be able to identify when further workup or referral is needed for a dermatologic complaint.

Concussion: what's new since the 6th international concussion in sport conference

- Understand current best practices for the management of sport-related concussions.
- Describe clinician management practice.
- Introduce early rehabilitation and exercise following a sport-related concussion.

The Role of the Buffalo Concussion Treadmill Test in Concussion Management

- Identify the clinical procedure of the BCTT.
- Understand how to interpret results obtained from a completed BCTT.
- Integrate data from the BCTT into rehabilitation programs following a concussion.

Throwing Biomechanics and Management of Overhead Athletes

- Understand and breakdown an athlete's throwing mechanics.
- Perform a quick UE assessment to rule out any dysfunctions or asymmetries.
- Correctly prescribe rotator cuff and scapular strengthening interventions for overhead athletes.

Rehabilitation of the Overhead Athlete: "Underneath" Factors Relevant to Overhead Function

- Identify factors associated with throwing-related injuries.
- Understand the mechanics of the lower half relative to the thrower.
- Describe common rehabilitation strategies for the overhead athlete.

ACL Reconstruction Surgery in a Professional Ice Hockey Player

- Identify and discuss the important points of an Athletic Trainer after ACL Reconstruction.
- Identify the positions of the lower extremities during biomechanical failure.
- Discussion of the referral process and insurance responsibilities with Worker's Compensation.
- Discuss early onset "prehab" and rehabilitation.
- Discuss decision making leading to permission of athlete to return to skating.
- Early Skating ques and advancement/summer programming.
